## Engineering is Elementary

**We're coming to South Australia in 2024!  
Are you looking for an exciting opportunity to  
enhance your teaching skills and to inspire  
students through STEM?**

**Apply now to participate in our FREE  
Engineering is Elementary 'Taking the Plunge:  
Designing Submersible', professional learning  
workshops.**

Our workshops will build your confidence and capacity to teach STEM in your classroom through:

- Getting hands-on experience with the activities in our integrated STEM units of work,
- Learning how to build student knowledge of STEM content and develop teaching strategies to meet the learning needs of your students, and
- Gaining the confidence to teach STEM in your classroom through the engineering design process.

On completing the workshop, you will receive a resource kit and a unit of work enabling you to immediately implement Engineering is Elementary in your classroom. You will also be connected to a national community of practice of teachers for ongoing collaboration and support!

**WHERE & WHEN**  
**Murray Bridge - 19 February**  
**Victor Harbor - 21 February**  
**McLaren Vale - 23 February**  
**Adelaide - 28 February**
